Journal Broadcast Group signs with LAN International

Aliso Viejo, CA – September 30, 2008 – Journal Broadcast Group has contracted with LAN International to license VIERO e-PIF, LAN's electronic public inspection file system.

VIERO e-PIF is groundbreaking software that allows broadcast companies to easily and safely manage their public files from a central location, and in a completely digital environment. Highly utilized in the radio industry, important new product enhancements have recently been added that will enable TV stations to comply with new FCC regulations that call for the posting of their public files online.

"We are thrilled to welcome Journal Broadcast Group to the VIERO family," said Patti Roberts, Senior Vice- President of Customer Relations at LAN International. "We look forward to working with them, and helping them continue their long tradition of excellence in the communities they serve."

Headquartered in Milwaukee, WI and touted as "America's Best Local Broadcast Company", Journal Broadcast Group operates 47 radio and television stations throughout the Midwest.

About LAN International

Now in its twelfth year of operations, LAN International is a software development company providing revolutionary revenue management solutions to broadcast radio entities under the brand VIERO®. The company currently serves 1,154 radio stations in over 220 markets across the United States, making it one of the largest providers of such systems in the nation. LAN's state-of-the-art, 24/7 customer support spans the nation with offices in the Aliso Viejo, CA (headquarters), Orlando, FL and San Antonio, TX.
